PREFACE.

In this volume the seals which appear upon the documents are reproduced in connection with the texts. In copying some of the smaller and closely written tablets of this volume, practically all of which are unbaked and many in a poor state of preservation, I have enlarged somewhat the reproductions, preserving, however, the relative position of the characters and all that the tablet contains, so that those who use the texts will not need to encounter the same difficulties which confronted the copyist. In the "Description of Tablets" the exact measurements of the documents are given, as well as what is known of the provenience of the material. This has been gathered from the Expedition archives, for which I am indebted to the editor, Prof. Hilprecht, who also kindly loaned me several books from his private library.

I am indebted also to B. Franklin Pepper, Esq., the Chairman of the Babylonian Section, for his kindness in improving my efforts to give in legal phraseology the contents of the translated texts. My thanks are due also to Prof. Jastrow for his kind assistance in connection with the proof-reading, as well as for his many acts of kindness as Librarian; to Prof. Rogers, of Drew Seminary, for some references from works which I do not possess, and also to Dr. Arthur Ungnad for suggestions in connection with one of the deities of these texts. I desire to express my thanks also to Dean Robbins, of the General Theological Seminary, New York City, as well as to the Librarian of that institution, Mr. Edward H. Virgin, for their continued courtesies in connection with my work on the Hoffman Collection; and also to Sir C. Purdon Clarke and Mr. Edward Robinson, of the Metropolitan Museum of Art, for allowing me to copy the only known text of *Sin-shum-lîshir*. Through the kindness of Dr. Wm. Hayes Ward, who presented the tablet to the Museum, I learn that he purchased it in the winter or spring of 1884-5, at or near Baghdad (see p. 2). In conclusion I desire to express my gratitude to the Provost, and the other members of the Publication Committee, especially to Mr. Eckley B. Coxe, Jr., the generous founder of the Fund which makes possible the publication of these texts.

INTRODUCTION.

The texts from Nippur of those here published were excavated on the first, second and third expeditions which were sent out by the University of Pennsylvania, Professor John P. Peters being the Director of the first two, and Doctor John H. Haynes the Director of the third. The tablets found during the first expedition were partially classified by Professor Harper. These have come chiefly from along the Shatt en-Nil at the northwestern corner of the triangular mound, south of the Temple, known as Hill V, or as "Tablet Hill."¹ Toward the close of this campaign some tablets were found in Hill IV. During the second campaign "Tablet Hill" was skirted on all sides with trenches, when additional tablets of this period were found. Also some inscriptions were discovered in the extreme southern part of the mounds on the west side of the Shatt en-Nil, known as Hill X. During his operations on the third expedition, Doctor Haynes found additional tablets of this period. His reports show that he excavated in nearly all the mounds, but the records do not give the provenience of the tablets.

Besides the documents from Nippur which are contained in this volume, about fifty others belonging to the same period have thus far been classified, but which are fragmentary, effaced, or of comparatively little value. These I did not think it advisable to include. That this volume should contain the same number of plates of texts as my other volumes, namely seventy-two, I have added additional texts from *J.S.*, *Kh.*¹, *Kh.*², and *J. D. P.* Collections of the University, also from the *E. A. H.* Collection of the General Theological Seminary, and one from the Metropolitan Museum of Art, New York City.² The latter text (No. 141), which is the only one of the reign of *Sin-shum-lîshir* that is known, was published some

¹ In the chapter containing the "Description of Tablets" reference to the campaigns and the place of discovery are made on the basis of the diagram given in Peters, *Nippur*, Vol. I, facing page 242, which shows the hills and the trenches of the first expedition, and also in Vol. II, facing page 172, for the trenches of the second expedition.

² Cf. the "Description of Tablets" for a brief statement concerning the origin of these collections. This volume contains all the Neo-Babylonian texts of the *J. D. P.* Collection, namely three. Professor Barton of Bryn Mawr published the texts of *Kh.*² in *The American Journal of Semitic Languages*, Vol. XVI, No. 2. The *J. S.* and *Kh.*¹ Collections contain many additional fragments and partially effaced tablets which, without a close examination, appear to be of comparatively little value.

years ago by Doctor A. B. Moldenke.¹ Inasmuch as it is dated at Nippur, I have included it in this volume. The fact that it was dated at Nippur does not necessarily mean that it was found in that city, for cf. text No. 1 in my *B. E.*, Vol. X, which is dated at Babylon, and yet it was found in the *Murashû* archives at Nippur, to which it belonged. Even the witnesses of this document do not seem to be residents of Nippur. Presumably they belonged to Babylon, where the tablet, which is a lease of a building apparently for official purposes of the crown, was drawn up. This seems to follow from the fact that the lease expired *a-ši-e sharri*, "at the going out of the king." The *Sin-shum-lîshir* tablet, however, does not present a parallel case. The proper names do not contain any elements that are peculiar to Nippur, which, of course, may be a coincidence, but the contents clearly show that it belongs to the archives of the Shamash-Temple at Sippara, the same as a large number of those which have been published by Moldenke, belonging to the same period.

The Nippur tablets of this period offer a few peculiarities in contrast to those published here and elsewhere from Babylon, Borsippa and Sippara. Among these, as I have previously pointed out in my *Dissertation* (unpublished), is the fact that generally only the father's or family name is given (cf., however, 114 : 10). Usually this is not the name of a trade or profession, but of a person. The fact that in the documents of the *Murashû* sons, *Rîmût-NINIB*, who is the son of *Ellil-hâtin*, the son of *Murashû*, is generally called the son of *Murashû*, would lead us to infer that the second name is frequently to be regarded as the family name.

Another point that might be referred to is the interesting oath formula of texts Nos. 4 and 58, the latter reading as follows:

a-na la e-ni [sha-ta]-ri a-na ah-rat ûmu(mu)
nish Ellil u NIN-[LIL ilâni] âli-shu-nu zak-ru
nish NINIB u Nusku [ra-bi-iš] shul-lum-shu-nu zak-ru
nish ^mKur-ra-ash shar matâti shar sharânu bêli-shu-nu zak-ru.

"That they would not alter the tablet to the end of days, they swore by Ellil and NIN-LIL the gods of their city; they swore by NINIB and Nusku the guardian(s) of their peace; they swore by Cyrus king of countries, king of kings, their lord."

Cf. also text No. 25, *Ina Ellil u NIN-IB it-te-me*, "By Ellil and NINIB they swore." On the use of the names *Ellil*, *NINIB* and *Nusku* in the oath formulas of Nippur documents, cf. my *B. E.*, Vol. XV, p. 2.

¹ Cf. *Cuneiform Texts in the Metropolitan Museum of Art*, Part II, No. 1.

² The restorations are made on the basis of text No. 4.

Here an observation might be mentioned also in connection with the *šupru*, "thumbnail mark," which was made instead of a seal impression. It appears quite evident that the custom of making thumbnail marks had become conventionalized, in much the same manner that the seals are often printed in documents of the present day, which by law are necessarily given in connection with the signature, because on a number of tablets the impressions were not made by means of the thumbnail, but apparently by some instrument, see Plates IV and V. This is evident from the regularity with which they were made, as well as from the shape of the impressions. To make an indentation similar to those in question, it would be necessary to trim the nail in a very peculiar manner; in fact it would be difficult ordinarily to make the identical indentations with the thumbnail, except by carefully rotating the thumb. It is not impossible that this was actually done by the scribe. Usually on the documents referred to there are nine marks on each edge, and six on each end. The uniformity and care with which these have been made clearly indicate that they are not the work of an inexperienced contractor, but of the scribe who wrote the document. This is evident after a comparison of these marks with those obviously made by the man upon whom the obligation rested, cf. my *B. E.*, Vol. X, Pl. VI. But on examination there seems to be little doubt that the impressions were made by means of an instrument, presumably made of a reed, such as grow in the marshes of the Euphrates, out of which the ancients made the stylus. It is not at all improbable that they were made by the upper end of the stylus in use by the scribe. For a discussion of the stylus, cf. my *B. E.*, Vol. XIV, p. 17, and the important presentation of the subject by Doctor Leopold Messerschmidt, *Zur Technik des Tontafelschreibens*.

As early as 1877, Boscawen¹ attempted to fix the length of reigns, and the time of the year when the kings of the Neo-Babylonian and Persian periods began to rule, on the basis of the collections of contract literature in the British Museum, the largest portion of which had been purchased the previous year by the famous decipherer George Smith, on his last and fatal expedition to Mesopotamia. Professor Eduard Meyer in his *Forschungen zur alten Geschichte*, Vol. II (1899), makes use of this material, and what was subsequently discovered in his discussion of the chronology of this period. Considerable additional material has since been found, which enables us to approach nearer to the exact time when the kings began to reign, as well as to increase our knowledge concerning the length of the reigns. With this

object in view I have constructed the following table,¹ which gives the earliest dated tablet of each reign that has been published up to the present, as well as the latest. From this list it will be observed that the dated texts of this volume, as well as those recently published by Doctor Arthur Ungnad of The Royal Museum in Berlin, give the historiographer or chronologer additional data on the subject.

¹ For this purpose I have examined the dates of the tablets published by Peiser, *Keilschriftliche Acten-Stücke, Babylonische Vertrag* and *Keilschriftliche Bibliothek*, IV; Moldenke, *Cuneiform Texts in the Metropolitan Museum of Art, New York City*; Strassmaier, *Babylonische Texte*, and *Die Babylonische Inschriften im Museum zu Liverpool, Sixth Oriental Congress*, 1883; Pinches, *Inscribed Babylonian Tablets in the possession of Sir Henry Peek*; Weissback, *Babylonische Miscellen*; Evetts, *Inscription of the Reign of Evil Merodach, Neriglissar and Laborosoarchod*; Winckler, *Z. A.*, II; Strassmaier, *Z. A.*, III and IV; Barton, *American Journal of Semitic Languages*, XVI; Ungnad, *Vorderasiatische Schriftdenkmäler*, Hefte III and IV; Budge, *Z. A.*, III; Sayce, *Z. A.*, V; King, *Z. A.*, IX; Hilprecht and Clay, *Babylonian Expedition*, IX; Clay, *Babylonian Expedition*, VIII and X; also inscriptions in *C. T.*, etc.

² Oppert, *Roi d'Assyrie*, *Z. A.*, VII, p. 341, gives several dates of *Kandalānu* up to 21-2-13 from tablets which do not seem to have been published. Pinches, *Proc. Soc. Bib. Arch.*, 1882-3, Vol. V, p. 6, refers to tablets dated in the reign of *Kandalānu*. Doubtless these are the texts referred to by Oppert. The dates given are 6-6-4; 10-12-17; 12-12-4; 16-5-8; 16-6-13; 19-9-23; 19-12-13; 21-2-13.

³ It is impossible to determine which belong to *Nebuchadrezzar III* (= *Nidintu-Bēl*) and which to *Nebuchadrezzar IV* (= *Araḥu*), cf. Ungnad, *O. L. Z.*, No. 9, p. 465.

⁴ Cf. Eduard Meyer, *Forschungen zur Alten Geschichte*, II, p. 474f.

⁵ On *Shamash-erba*, cf. Meyer, *Forschungen zur Alten Geschichte*, Vol. II, p. 476, and Ungnad, *O. L. Z.*, Sept., 1907, p. 466.

⁶ Cf. Ungnad, *Orientalistische Literatur-Zeitung*, Sept., 1907, Col. 466f.

In some instances it may be important to know the next to the last tablet dated in the respective reigns. With this in view let me add the following: The next to the last date of the tablets belonging to the reign of *Shamash-shum-ukîn* is 15-1-14, cf. Peiser, *B. V.*, II; of *Kandalânu* is 13-7-15, cf. Moldenke, *C. T. M. M.*, Part II, No. 5; of *Nabû-apal-uşur* is 19-6-30, *ibid.*, No. 15; of *Nabû-kudurri-uşur* is 43-4-27, cf. Strassmaier, *Nbk.*, No. 415; of *Amêl-Marduk* is 12-5-4, cf. Evetts, *Ev.*, No. 24; of *Nergal-shar-uşur* is 2-5-3, cf. Ungnad, *V. S.*, No. 43; of *Nabû-nâ'id* is 17-8-10, cf. Strassmaier, *Nbn.*, No. 1054; of *Kurash* is 9-5-13, cf. Clay, *B. E.*, VIII, 74; of *Kambuzia* is 7-7-1, cf. Ungnad, *V. S.*, No. 86; of *Barzîa* is 1-6-20, cf. Strassmaier, *Z. A.*, IV, p. 152; of *Dariamush I* is 36-6-13, cf. Ungnad, *V. S.*, No. 165; of *Ahshiar-shu* is 5-4-2, cf. Evetts, *Xer.*, No. 5; of *Artahshatsu I* is 41-9-12, cf. Hilprecht-Clay, *B. E.*, IX, No. 108, and of *Dariamush II* is 11-6-21, cf. Clay, *B. E.*, X, No. 131.

It will be observed that the date of the last tablet of a reign is no indication necessarily that the king was at that time ruling. For example, *Nabû-nâ'id* was dethroned and imprisoned shortly after the 16th of Tammuz.¹ On the 3d of Marchesvan Cyrus entered Babylon, and on the 11th *Belshazzar* was killed.² And yet a tablet has been found dated in the reign of *Nabû-nâ'id* on the day before the death of *Belshazzar*, and even in the following month. The first tablet that has been found dated in the reign of Cyrus was written on the 24th day of Marchesvan, that is thirteen days after *Belshazzar's* death.³ Another instance that might be cited is the reign of *Artaxerxes I*. The first tablet of his successor, *Darius II*, was dated on the 4th day of Shebet, which is six days previous to the last dated tablet of the former ruler, namely *Artaxerxes I*. It is not unreasonable to explain such discrepancies as mistakes on the part of the scribe, who continued to date tablets in the old reign, forgetting for the moment the advent of the new reign. It is not impossible also that the coronation ceremonies had something to do with this overlapping of reigns. In this volume of texts, No. 127 is dated on the 20th day of Adar of the "forty-first year (*i.e.*, of *Artaxerxes I*), the accession year of *Darius*."⁴ This implies that although a new king sat on the throne and it was regarded as his accession year, there was no hesitancy in continuing to date tablets also according to the year of the previous reign.

While this is true with reference to the latest dated tablets, it is scarcely possible that a single ruler did not occupy the throne on or before the earliest date

¹ Cf. Hagen, *Cyrus Texte*, *B. A.*, II, pp. 222, 223.

² *Ibid.*

mentioned in such documents, so that it is safe to imply that the beginning of the reign was on or previous to the earliest date given in the accession year of the ruler.

Two documents, Nos. 1 and 159, of those here published are dated in the reign of *Ashurbânâpal*. Unfortunately the second is fragmentary and the date is wanting. The three tablets, Nos. 4, 5 and 6, dated in the reign of *Ashur-etil-ilâni*-(*ukîn*), are the only texts published¹ of this reign, except the two short inscriptions in Rawlinson, Vol. I, p. 8, No. 3, which are translated by Winckler, *Keilinschriftliche Bibliothek*, II, pp. 268ff. *Sin-shum-lîshir*, king of Assyria, is only known through the one tablet which is now in the Metropolitan Museum, New York City (see p. 1).

Besides the poorly preserved cylinder and fragmentary duplicate of *Sin-shar-ishkun*, which contain simply his titles and vain words of boasting, and the text here published (No. 157), the year of which is wanting, only three other contracts have been found belonging to this reign. One of these, which has been published by King in the *Zeitschrift für Assyriologie*, IX, p. 39ff., is dated at Uruk. Evetts published a second in Strassmaier, *Babylonische Texte*, VI, B, which is dated at Sippara on the 20th of Iyyar of his second year. Another, which is in the Berlin Museum, the transliteration and translation of which is published by Peiser, *Keilinschriftliche Bibliothek*, IV, 174f., is also dated at Sippara on the first of Iyyar of the same year.

The other tablets of those here published, dated in the reigns of kings prior to the fall of Nineveh, belong to the time of *Shamash-shum-ukîn*, *Kandalânu* and *Nabopolassar*. These were not excavated at Nippur. They belong to other collections which have come from Babylon, Borsippa and Sippara. In connection with the inscriptions from Nippur the question naturally arises, Do they offer any historical data which throw light upon the closing days of the Assyrian rule?

George Smith, in 1871, in his *History of Ashurbânâpal*, p. 323f., was the first to suggest that *Κινηλαδάνας* and *Ashurbânâpal* were one and the same. He apparently came to this conclusion without the testimony of Berosus, mentioned below. Pinches, in the *Proceedings of the Society of Biblical Archaeology*, V, p. 6 (1882), announced the discovery of tablets dated in the reign of *Kandalânu*, which he recognized to be the same as *Κινηλαδάνας*. A little later, in 1885, Sayce contested Smith's view that *Kandalânu* was *Ashurbânâpal*; see his *Assyria, Its Princes, Priests and People*, pp. 53 and 159. Schrader, however, cf. *Zeitschrift für Keilschriftforschung*, Vol. I, pp. 222ff., attempted to prove what Smith had proposed, and advanced the theory that after the revolt and death of *Shamash-shum-ukîn*,

¹ Cf. Hilprecht, *Z. A.*, IV, p. 164; also Harper, *Academy*, Apr. 30, 89, and *Hebraica*, VII, p. 79.

Ashurbânâpal proclaimed himself king under the name *Kandalânu*. In opposition to this view, Oppert, in the first article of *Revue d'Assyriologie*, Vol. I, pp. 1–11, 1886, followed Sayce in maintaining that these two rulers were not identical. Cf. also Smith-Sayce, *History of Babylonia*, p. 140, 1895.¹

The view of Smith and Schrader has been generally accepted by Assyriologists and historians; cf. Mûrdter and Delitzsch, *Geschichte Babyloniens und Assyriens*, p. 230; Lehmann, *Shamashshumukîn*, p. 6; Winckler, *Geschichte Babyloniens und Assyriens*, pp. 135 and 289, and *Keilinschriften und das Alte Testament*, pp. 50, 98; Tiele, *Babylonische-Assyrische Geschichte*, pp. 368, 369, 412–14; Rogers, *History of Babylonia and Assyria*, II, pp. 268, 297f.; Maspero, *Passing of the Empires*, p. 423; King, article "Babylonia" in *Encyclopædia Biblica*, I, Col. 451, and *Chronicles*, I, p. 208; Bezold, *Nineve and Babylon*, p. 61; Lindl, *Cyrus*, p. 85, etc.

The proof adduced in favor of the identification depends solely upon Berosus-Polyhistor-Eusebius, who say that after *Sammuges*, his brother reigned. Eusebius reports in his *Chronicorum Canonum* (cf. Lehmann, *Shamashshumukîn*, I, p. 2, quoting from Schoene, *lib.*, I, pp. 27, 33 sq.): "*Etenim sub Ezekia regnavit Sinacherim, ut Polyhistor exponit annis XVIII et post eum eiusdem filius annis VIII. Postea vero Sammuges annis XXI et eius frater annis XXI.*" "*Post Sammugem vero Sardanapallus Chaldeais regnavit annis XXI.*" Claudius Ptolemaus, in his *Canon*, makes Κινηλαδάνος (*Kandalânu*) follow Σαασδουχινος (*Shamash-shum-ukîn*). Lehmann, *Shamashshumukîn*, I, p. 6, in the following words, seems to represent the position generally taken by scholars:

Shamashshumukîn's Nachfolger auf dem babylonischen Throne ist Asurbanapal. Dieser verhängte zwar, wie Sanherib, ein Strafgericht über Babylon, aber er hat nicht wie sein Grossvater, die Selbständigkeit des Landes vollständig vernichten wollen, sondern hat, das lässt sich aus den Canones und Datirungen schliessen, in rechtmässiger Weise die Herrschaft über Babylonien angetreten. Mit seinem Bestreben, statt der factisch bestehenden Unterordnung unter Assyrien, das Verhältniss möglichst als eine Personalunion erscheinen zu lassen, wird es auch zusammenhängen, dass er als Babylonischer König seinen Namen änderte und sich Kandal(anu) nannte (Königsliste und Contracttäfelchen), ebenso wie früher vermuthlich aus den gleichen Gründen Tiglatpileser II sich in Babylonien Pulu, Shalmanassar IV sich Ululai nannten.

The supposition that *Ashurbânâpal*, in order to palliate the feelings of the Babylonians, assumed the name *Kandalânu* in taking upon himself the reigns of

¹ Hommel, in his article "Assyria" in *Hastings' Bible Dictionary*, I, p. 189f., says it cannot be definitely determined whether *Kandalânu* is *Ashurbânâpal* or a rival king.

the government offers difficulties. In the first place it seems reasonable to suppose that such an act would be highly obnoxious to the people of Babylon, who for decades had been striving for an autonomous government, and especially after their leaders and warriors, who had fought for independence, had met such cruel deaths as a punishment at the hands of the Assyrian king on the termination of the insurrection. After relating in his annals his fearful atrocities, he says: "I restored and re-established, as it was in former days, their cult, which had been diminished. I showed mercy to the remaining inhabitants of Babylon, Cutha and Sippara, who had escaped slaughter, massacre and famine; and I ordered that they should be allowed to live, and permitted them to dwell in Babylon" (*K. B.*, II, pp. 192, 193). To have taken from them at that time their self-government surely would not have placated them, but would have increased tenfold their hatred for Assyria.

The absence of any reference in his annals or in any other inscription to his taking unto himself the title "King of Babylon," whether under one name or another, is surely significant. And why should he assume the name *Kandalânu*? It is not a Babylonian nor an Assyrian name.¹ It occurs in Johns, *Assyrian Deeds and Documents* (cf. Vol. III, p. 49), twice as the name of slaves (Nos. 58 and 230), once as the name of a witness in 683 B.C. (No. 51), and of a seller (No. 500). As a slave in No. 58, *Kandalânu* is sold with *Kurdi-Adad*, another foreign name, together with their families. The earliest occurrence of this name is in the texts of the Cassite period, cf. my *B. E.*, Vol. XV, 176 : 11, where *Kan-da-la-ni* is written. Here it may be a Cassite name, or even a name from the land Khannigalbat. What significance could the adoption of such a name by *Ashurbânâpal* have, especially as he had been the actual sovereign of Babylon for twenty years, and doubtless was well known by the name *Ashurbânâpal* from the day of his birth? True, *Tiglathpileser* III was known as Πόρος (*Pulu*) in Babylon, and *Shalmaneser* IV as Ἰλουλαίος (*Ulûlai*). But these are not parallel cases. It is evident that both the names *Tiglathpileser* and *Shalmaneser* had been assumed by these rulers, and that perhaps *Pul* and *Ulûlai* were their original names. *Pul*, as is recognized, was a usurper. He was first called by the Biblical writer "Pul, king of Assyria," 2 Kings 15 : 19, and afterwards in verse 29, "Tiglathpileser, king of Assyria." This may or may not be significant. It is quite reasonable to infer that his son and successor had been born before he had been able to establish himself upon the throne of Assyria; and if so, it is more likely that his plebeian name was *Ulûlai*. On the

¹ I say this with at least some reserve. The only trace of a root *kadûlu* seems to be in the phrase *a-na ku-ud-dul be-lu-ti-shu-nu*, *K. B.*, III, pt. 2, p. 6, 2 : 15, which Winckler translates "Um ihre Herrschaft zu ehren(?)." .

other hand, it is scarcely possible that anyone would suggest that *Kandalânu* was the original name of *Ashurbânâpal*.

A more plausible conclusion, it seems to me, in the light of known facts and those which these texts offer, is that *Kandalânu*, who may have been a brother, is not to be identified with *Ashurbânâpal*; and that in accordance with the Canon of Ptolemy, which gives the names of the rulers or viceroys of Babylon after the time of Esarhaddon, they were *Shamash-shum-ukîn*, *Kandalânu* and *Nabopolassar*.

We know that *Esarhaddon* greatly sympathized with the people of Babylon, who were desirous of self-government, and that he assigned that principality to his oldest son, *Shamash-shum-ukîn*,¹ the son of his Babylonian wife,² as viceroy, with the understanding that he was to pay homage to his brother, *Ashurbânâpal*, as suzerain. The title, "King of Babylon," included jurisdiction over the cities Borsippa, Cutha and Sippara; in other words, it was synonymous with the title "King of Accad." However, *Ashurbânâpal* in all his references to the titles of *Shamash-shum-ukîn* distinctly says he appointed him to the "kingship of Babylon" (*sharrût Bâbili* or *sharrût Karduniash*). It is interesting to note in this connection that whereas *Ashurbânâpal* always designates him "King" or "Viceroy of Babylon," or "Karduniash" in his own inscriptions, *Shamash-shum-ukîn* appropriates to himself the title "King of Amnanu, king of Babylon, king of Sumer and Accad," and yet there is no evidence to show that he, nor the two viceroys that followed him, namely *Kandalânu* and *Nabopolassar* (until the latter conquered the land), ruled over any city south of Babylon (see below). *Shamash-shum-ukîn* was followed by *Kandalânu* and *Nabopolassar* as sovereigns or viceroys of those cities, as is clear from the dated contracts. The only dated tablets of Assyrian kings of this entire

¹ Cf. Meissner, *Mitteilungen der Vorderasiatischen Gesellschaft*, 1904, 3; also Johnson, *Journal American Oriental Society*, Vol. XXV, p. 80, who reached the same conclusions about the same time.

² Cf. Winckler, *Forschungen*, I, p. 417, note 1.

period that have come from Accad, or the kingdom of Babylon, are the two of *Sin-shar-ishkun* from Sippara, mentioned above.

That the cities to the south of Babylon were not assigned to him is further established by the fact that a contract is dated at Uruk in the twentieth year of *Ashurbânâpal*, cf. S. A. Smith, *Miscel. Texts*, No. XXXVIII, and, as is stated above, also one in the reign of *Sin-shar-ishkun*. Nippur was also retained under the direct control of Assyria. In this connection we recall the building operations of *Ashurbânâpal* at Nippur,¹ where he restored and enlarged the ancient sanctuary of Ellil, embellishing it in a manner scarcely known in its long history. No other king since the days of *Ur-Engur* did so much for Nippur as *Ashurbânâpal*. The evidence of his work is everywhere perceptible in the shape of bricks that are well burnt, containing his name, *Ashurbânâpal*, with his titles, in which he calls himself "king of the four quarters of the earth." This seems clear also from the fact that tablets have been found which had been dated in that city in the reigns of *Ashurbânâpal*, *Ashur-etil-ilâni*, *Sin-shar-ishkun* and *Sin-shum-lîshir*. These rulers are not called kings of Babylon, but kings of the country Assyria. These facts lead us to conclude that the country to the south of Babylon, *i.e.*, the country Sumer, remained under the direct control of Assyria, at least until *Nabopolassar* became the supreme potentate of the land.

The significant fact in this connection is that tablet No. 1 of this volume is dated at Nippur in the twenty-sixth year of the reign of *Ashurbânâpal*. If it were true that he had assumed the name *Kandalânu* in Babylon, and in every instance, as far as we know up to the present, the ruler was known by this name in that neighborhood, it seems unreasonable to suppose that at Nippur, not more than fifty miles distant, he should be known by his real name six years after the death of *Shamash-shum-ukîn* and his own enthronement in that city.

The viceroy of Babylon following *Kandalânu*, by the grace of Assyria, doubtless under *Ashur-etil-ilâni*, was *Nabopolassar*. Contracts dated in the reign from the second to the twenty-first year show that the Ptolemaic Canon in making him the successor of *Kandalânu* is correct. That he, under the name *Bussalossoros*, should be a general of Saracos (*Sin-shar-ishkun*), as told by Berosus-Abydenus (cf. Müller-Didot, *Frag. Hist. Græc.*, IV, p. 282), is not difficult to understand if we take into account that he was a vassal king. If *Shamash-shum-ukîn*, who ruled before *Kandalânu*, and *Nabopolassar*, who ruled after him, were viceroys of Babylon who owed their titles to Assyria, is it not reasonable to suppose that *Kandalânu*, who

¹ It is well known that he paid considerable attention also to the restoration of Esagila in Babylon.

reigned between them, should also have been a viceroy, instead of regarding him as the Assyrian king himself? And is it not unreasonable to suppose that the policy inaugurated by *Esarhaddon* to give the Babylonians an autonomous government was for twenty-one years set aside, and then for no apparent reason was again resumed? That the reign of *Kandalânu* and *Ashurbânapal* should come to a close about the same time is significant, but that may be due to the fact that the term of office expired with the close of the reign, or it is the possible time of his death. Other plausible reasons could be suggested to explain this coincidence.

What seems to be noteworthy evidence in this connection is to be found in the annals of *Ashurbânapal*, where, after he records the punishment of the insurrectionaries, he says: "The people of Accad, together with those of Kaldu, Aramu and the country of the sea-coast whom *Shamash-shum-ukîn* had allied to himself and had made of one mind, became hostile to me by their own decision. By the order of Ashur and Bêlit and the great gods, my aids, I completely subjugated them. The yoke of Ashur, which they had thrown off, I imposed upon them. Governors and prefects, appointed by me, I placed over them." In these annals, which were written six years later, we find no reference, as mentioned above, to the effect that *Ashurbânapal* ever assumed the title "King of Babylon"; but on the other hand he distinctly says that he set over Accad governors (*SHA-KUR^{pl}*) and prefects (*BAD-GID-DA^{pl}*) after subjugating the land (Col. IV, 97-104).

The situation seems to me to be that after the death of *Shamash-shum-ukîn*, *Ashurbânapal* installed as viceroy *Kandalânu*, perhaps his brother or half-brother, a son of one of *Esarhaddon*'s foreign wives, if Berosus' statement is correct. While the inscriptions do not mention *Kandalânu* as the son of *Esarhaddon*, it is quite natural to suppose that the latter had other sons, legitimate and otherwise, besides those that are mentioned; for cf. Pinches, *Texts in the Babylonian Wedge Writing*, p. 17, li. 12ff., where *Ashurbânapal* mentions three of his brothers, *Shamash-shum-ukîn*, *Ashur-mukîn-palêa* and *Ashur-etil-shamê-u-iršiti-uballitsu*, to whom he had made assignments. In view of these facts it seems reasonably certain that the opposition raised more than a score of years ago by Professor Sayce, the only living representative of this view, as far as I can ascertain, is sustained, namely, that *Ashurbânapal* and *Kandalânu* are not identical.

Besides the inscriptions referred to, which belong to the reigns of *Ashur-etil-ilâni*, *Sin-shum-lîshir* and *Sin-shar-ishkun*, we have no light from the cuneiform inscriptions upon the last twenty years of Assyrian rule. *Ashur-etil-ilâni* doubtless followed *Ashurbânapal*, as he called himself his son. According to text No. 5, which

is from Nippur, he was ruling in Marchesvan of his fourth year. How much later remains to be determined.

The text dated in the reign of *Sin-shum-lîshir* (No. 141) is valuable in that it gives us the name of another Assyrian king doubtless of this period, but exactly where he is to be placed in the list remains uncertain. It is dated in his accession year, so he may have ruled only a few months. It has been suggested that he was the predecessor of *Sin-shar-ishkun* (cf. Sayce's editorial note in Maspero, *Passing of the Empires*, p. 481). This is doubtless correct, if we can rely on the account of Abydenus (see below) concerning the fall of Nineveh, when *Sin-shar-ishkun* (*Sarakos*) is supposed to have burnt himself alive. At the same time it should be noted, in the light of Scheil's discovery, that *Sin-shar-ishkun* was a son of *Ashurbânâpal*, cf. *Zeitschrift für Assyriologie*, Vol. XI, p. 47ff., in which, if the rule of *Sin-shum-lîshir* intervened, he would be the third removed from his father in the line of succession.

It is generally held that *Sarakos* (*Sin-shar-ishkun*), following Abydenus, cf. Müller-Didot, *Fragmenta Historicorum Græcorum*, Vol. IV, p. 283f., was the last king of Assyria. And yet it must be admitted that the Greek *Sarakos* is considerably removed from the writing *Sin-shar-ishkun*. However, in the absence of any other identification, assuming that it represents this ruler, *Nabopolassar*, whose reign as king or viceroy was contemporaneous with *Ashur-etil-ilâni*, *Sin-shum-lîshir* and *Sin-shar-ishkun*, is found in tablets dated at Sippara in the second, seventh, and in nearly every year from the ninth to the end of the reign (cf. King, *Zeitschrift für Assyriologie*, IX, p. 397, and Moldenke, *Cuneiform Texts*). These dates must be taken into consideration with the two texts from Sippara of the second year of *Sin-shar-ishkun*, mentioned above. If *Ashur-etil-ilâni* ruled about five years after *Ashurbânâpal*, it seems plausible to assume that about two years after the advent of the new reign was the time when the two Sippar tablets of *Sin-shar-ishkun* were written, as we have no tablets dated at Sippara from the second until the seventh year of the reign of *Nabopolassar*.¹ It is not unlikely that *Nabopolassar*, who was viceroy under *Ashur-etil-ilâni*, declared himself free from the Assyrian yoke at the time of the latter's death; and that Sippara either remained loyal to Assyria for a season, during which time the tablets were written, or *Sin-shar-ishkun* temporarily

¹ King (cf. *Z. A.*, IX, p. 397) is of the opinion that those which are dated in Babylon belong to the 6th and 10th and 14th years; in Sippar to the 15th and 18th years, while others found at Abu Habba, and therefore probably also referring to transactions in Sippara, were dated in his 2d, 7th, 9th to the 12th, 16th to the 19th and 21st years. The tablets published by Moldenke are dated in 8th, 9th, 12th, 13th, 14th, 17th and 19th years, most of which seem to have come from Sippar. Weissbach, *Bob. Miscellen.*, No. XV, in the 19th year, is from Babylon; Pinches, *Peek Collection*, No. 2, in 14th year, is from Babylon; and of the texts here published Nos. 7 and 8 are dated at Babylon and belong to the 8th year.

restored the Assyrian domination over Sippara by force, but which ultimately fell into the hands of *Nabopolassar*. This seems to be the only time in the history of *Nabopolassar*, namely, between his second and seventh years, that *Sin-shar-ishkun* is likely to have been recognized as ruler in that city.

Barzîa, or the Persian *Gaumâta* who impersonated *Barzîa* (i.e., *Bardîya*, cf. Justi, *Iranische Namenbuch*, p. 63), according to the Behistun inscription (cf. Weissbach and Bang, *Die Altpersischen Keilinschriften*, p. 15), headed a revolt on the 14th of *Viyakhna* (Adar).¹ On the 9th of *Garmapada* (Abu) he seized the throne and was crowned. Unless we assume that *Barzîa* ruled longer than a fraction of a year, it is impossible to reconcile these statements with the dates gathered from the tablets of his reign, as the earliest is dated in Iyyar of his accession year, cf. Strassmaier, *Z.A.*, IV, p. 147. This cannot be regarded as a mistake, since No. 37 of Peiser, *Babylonische Vertrag*, which is dated on the sixth of Sivan, is also of his accession year. Even if he had been recognized as king as soon as he began the revolt, his accession year would only begin on the 14th of Adar.

The Behistun says he was killed on the 10th of *Bâgayâdish* (Nisan). If this is correct, his rule did not come to a close before the second year of his reign, as the latest tablet is dated on the first day of Tishri of his first year. The occurrence of the dates on the published tablets of *Barzîa* are suggestive also of an error in the date given in the Behistun inscription concerning his death, which according to Herodotus was followed by the selection of *Darius*, the son of *Hystaspes*, as ruler. A number of the tablets published by Strassmaier as well as in the present volume are dated in Elul of his first year. The last is dated on the first day of Tishri (mentioned above) and then they suddenly cease. The date of the death of *Barzîa*, according to the Behistun, if the identification of *Bâgayâdish* with Nisan is correct, is six months later, after which there is an interval of nearly a year prior to the first tablet dated in the reign of *Darius II*. In the reconstruction of the history of this period cognizance of these facts must be taken by the chronologer and the historiographer.

The dated tablets of *Artaxerxes I* show that he ruled, instead of forty years, as given by Diodorus, about forty-two years.² Unfortunately tablets of his accession year have not been found, so that we are uncertain how many months he ruled of the last year of his predecessor's reign. Inasmuch as tablets are dated in his rule

¹ For the corresponding Babylonian months cf. Ginzel, *Handbuch der Mathematischen und Technischen Chronologie*, p. 276, and Oppert, *Stockholm Congress*, Vol. II, p. 254f.

² Cf. also Eduard Meyer, *Forschungen zur Alten Geschichte*, Vol. II, p. 485f.

after *Darius II* became king, we can only say that his reign came to a close on or before the fourth day of Shebet, which is the earliest date given in the latter's reign.

Diodorus (Chap. VII) says *Artaxerxes I* reigned forty years and was succeeded by *Xerxes II*, who reigned only one year; but he adds, "some say only two months." Plutarch informs us that *Xerxes II* ruled forty-five days. Diodorus tells us that *Sogdianus*, who murdered *Xerxes II*, ruled seven months, "who, being killed, *Darius (Nothus)* enjoyed the kingdom nineteen years."

It will be difficult to determine which of the tablets published in this volume, and in others, that are dated in the reign of the first twenty years of *Darius* belong to *Darius I* or *Darius II*, until more documents of the period subsequent to *Darius II* have been found at Babylon, Borsippa and Sippara, from which cities the bulk of those published have come. Concerning the *Murashû* documents from Nippur, there can be no question as to which *Darius* is meant, inasmuch as the archive is confined to the reigns of *Artaxerxes I*, *Darius II*, and *Artaxerxes II*.¹ I regard Nos. 127 and 128 of the present volume as belonging to *Darius II*, as some of the names occur also in the documents of *Murashû Sons*, dated in the reign of *Darius II*.

The *Murashû* documents, however, do show us, as above, that *Darius II* began to reign on or before the fourth of Shebet in the forty-first year of *Artaxerxes I*. This makes it impossible to reconcile the statements of Diodorus and Plutarch with the dates gathered from these tablets. For, as stated above, tablets are dated in the reign of *Artaxerxes I* even after *Darius II* was known as king, which would seem to imply that no rule intervened; and yet Diodorus inserts *Xerxes II* and *Sogdianus*, the former having ruled one year, or two months as another writer says; and the latter seven months, or, as another says, six months and fifteen days before *Darius* was selected king. For an exhaustive discussion of the chronology of the Persian period, as based on a study of the Grecian historians and the dates gathered from contract tablets until within a decade, see Meyer, *Forschungen zur alten Geschichte*, Vol. II.

Translation: The document concerning the possessions which *Nabû-mukîn-zêr*, son of *Aplâ*, son of *Rê'û alpê*, sealed and gave to *Nabû-shum-ukîn*, son of *Êtir-Marduk*, son of *Rê'û alpê*. *Nabû-shum-ukîn* of his own free will gave to *Nabû-mukîn-zêr*, son of *Aplâ*, son of *Rê'û alpê*, 6 minas of silver, a present in consideration of those possessions. Yearly 6 kors of barley, 60 *qa* of sesame, and in addition, monthly 5 *UR-SHÎR*, *Nabû-shum-ukîn*, as long as *Nabû-mukîn-zêr* lives, shall pay to *Nabû-mukîn-zêr*. *Amat-TUR-E-uşur*, the slave of *Nabû-mukîn-zêr*, whose *marru* *Nabû-mukîn-zêr* establishes, the document upon whose hand he raises, and in the interest of the herd he declares him free, *Nabû-mukîn-zêr* of his own free will turned over to *Nabû-shum-ukîn* for the shepherding of the herds. Food and clothing *Nabû-shum-ukîn* shall give to *Amat-TUR-E-uşur*. One document both take.

Following the names of five witnesses and the scribe, besides the date, is written:

Amat-TUR-E-uşur as long as *Nabû-mukîn-zêr* lives shall have respect for *Nabû-mukîn-zêr*.

Annotations: L. 10. *sha-du-ù*. Muss-Arnold, D. A. L., p. 1011b, raises the question whether there is a verb *shadû*. The above passage seems to show that there is.

Annotations: L. 6. *û-ri-i-ma*. Delitzsch makes the root תריח, cf. *Handwörterbuch*, p. 713. It is more likely a derivative from תרע, cf. the Aramaic for "gate," "entrance." In this document it refers to the protection of the gate, in other words has the meaning "to protect," "guard," cf. *Marduk belu rabû ta-ru-u*, "guardian," *nishê-shu*, *V. R.*, 35, 14.

L. 7. *uk-tal-li-mu*, with reflexive signification, meaning "oversee," "guard."

(Following the names of three witnesses and the date there is written:)

If he does not bring (them), everything according to the document which (has been taken out) against *Nâbi-Ellil*, *Shum-ukîn* and *Shamash-ahê-iddina* he shall make good; *Ardu-NINIB* shall pay in full. *Mushêzib-Nabû*, son of *Ubar* (is the name of an additional witness).

Annotations: L. 23 *im-me-riq*, as I showed in my *Dissertation* (1893, unpublished), comes from *marâqu*, which means "to satisfy a claim," "pay in full," cf. the passage in *B. E.*, IX, 48 : 18. *Ina ûmi paqaru ina muhhi^{shezêru} shu'ati ittabshu^m Ba-ga'miri^{shezêru} shu'atu u-mar-raq-am-ma ana Ellil-shum-iddina inamdin.* "If a claim should arise against that field *Baga'miri* shall satisfy the claim against (clear the encumbrance of) that field and pay to *Ellil-shum-iddina*" (cf. *ibid.*, p. 37 and note, p. 39). This meaning will suit the context in Peiser, *B. V.*, LXXIII, 7, and LVI, 9; cf. Muss-Arnold, *Dictionary*, p. 592, "to show, prove a claim." In Aram. כִּרַּק means "to cleanse, purify, clear." In legal parlance in Babylonian "to clear of encumbrances." Cf. also the passage *B. E.*, IX, 64 : 8, *la iddannu suluppu mala ina libbi im-me-ri-iq-qu-u appi 30 gur ana i mana kaspu inandin*; "has not given, the dates, as many as there are thereof, shall be paid in full. At the rate of 30 kors for 1 mina of silver he shall pay."

Translation: A coated(?) house, owned by *Nergal-ahê-iddina*, son of *Pattazu*, is given for house rent for a year at 36 shekels of *ginnu* silver to *Iddina-Bêl*, son of *Shamash-shum-lîshir*, son of *Nazua*, and *Pattazu*, the father of *Nergal-ahê-iddina*. The bareness (of the walls) he shall alter, the cracks he shall remove. In Nisan, Tammuz and Kislev he shall plaster the roof(?). From the 15th of Marchesvan the house is at his disposal. Monthly the house rent he shall pay. According to the document at their disposal. One document they take.

The names of five witnesses, of the scribe and the date follow.

Annotations: L. 10. The root of *nûptum* and *inâpi*, as has been suggested by others, seems to be נִיב or נִיפ, cf. the variant *i-nu-ub-bu-'*, Dar. 163 : 13. *Nûbtum inâpi* is one of the usual obligations which are placed upon the individual who rents a house. It has reference to the care of some part of the house, presumably either the walls or the roof, three times a year, in Nisan, Tammuz and Kislev. It figures, however, not so frequently in the leases of the Neo-Babylonian period, as in the Achæmenian. Including the variant phrase *nûbtum inamdin*, it occurs: *Cyr.*

228 : 9; *Camb.* 117 : 8; 182 : 6; 184 : 9; 187 : 10; *Dar.* 25 : 7; 163 : 13; 191 : 7; 256 : 9; 485 : 9; 499 : 10; also Peiser, *B. V.*, 41 : 7; 44 : 7; 134 : 7; 135 : 8. The reading "Nisan, Ab (or Airu), and Kislev," cf. Muss-Arnold, *D. A. L.*, p. 705, must be in every case "Nisan, Tammuz and Kislev." In all the passages examined these are the three months mentioned. *Nbn.* 239 : 15f. perhaps throw some light on the meaning of the phrase; it reads: *arbu* *Visannu arbu* *Dázu u arbu* *Kislínu* 3 ^{qan} *si-el-lu sha ta-bi-lu i-nam-din-mu*. Demuth, *B. A.*, III, p. 424, suggests that *tábilu* means "Backshish for the master of the house," cf. also Muss-Arnold, *D. A. L.*, p. 1144. Cf., however, Kohler, *Z. A.*, VI, p. 443, who says the lessee übernimmt zur Reparatur. The passage probably means, "In Nisan, Tammuz and Kislev they shall furnish three baskets of roof mixture." Cf. also *Nbn.* 500 : 12, which reads: *ina shatti 2 GUD . . . sha 1 qa A.A.N ta-bi-lu i-nam-din*. Unfortunately in this passage the word that would throw light on the subject is uncertain. The same is true of *Cyr.* 23 : 12, and *Nbn.* 9 : 9. ܠܒܠ (a denominative of ܠܒܠ) in Aramaic means "to mix." I learn from Dr. Talcott Williams that in Syria the flat roofs at the present time contain a layer of earth from six to twelve inches in thickness, which is plastered with a layer of mud, mixed with straw, as a protection against rain. Although such roofs need constant attention to make them impervious, periodically, following the rainy seasons, it is necessary to beat and trod down and then roll this layer of clay, in order to make it compact, which is to insure against destruction of the roof during the dry season. It is not impossible that the clause *nūbtum ināpi* refers to the application of a mixture of some kind, presumably of clay and oil, or clay and bitumen (the latter being used extensively in connection with boats and vessels in Babylonia), in order to prevent them from leaking, cracking and being destroyed by the elements and by usage. From the many limestone roof-rollers found by Place, cf. *Nineveh*, I, 293, it can be inferred that the Assyrian houses had flat roofs in ancient times, as at the present are found in Syria and other lands. This explanation may throw light upon the expression *bītu ta-bi-lu* in line 1, i.e., it is a house coated with a certain preparation. *Bītu tábilu* occurs also *Nbk.* 441 : 2. That seems more plausible than to translate "Gewürz," with Delitzsch, *Handwörterbuch*, p. 700, and Muss-Arnold, *D. A. L.*, p. 1144.

Translation: The house of *Šillu-Ezida*, son of *Nabû-shūzubuanni*, son of *Shīta* . . . and *Bu'itum*, the *riqqu* officer, for rent is at the disposal of *Nidintum*, son of *Bazūzu*, son of *Rab-enzu*. For two years *Nidintum* shall pay 4½ shekels of pure silver as house rent. Out of it 2 shekels of pure silver *Bu'itum* has received from *Nidintum*. One (document) they take.

Following the names of five witnesses, the scribe and the date is written:

"From the first day of Nisan for two years the house is at the disposal of *Nidintum*; yearly(?) . . . shekels of silver."

Annotation: L. 23. The text contains also the words: *bîtu* ^m*Ni-din-tum*, which apparently are a mistake of the scribe.

Translation: The impost of barley of the district adjoining the canal of the potter (*paharu?*), and the district of the *maḥiṣê*, as much as it is, which *Nergal-iddina* fixed upon *NINIB-nâdin-shum* and *NINIB-dannu*, his brother. According to the impost which *Nergal-iddina* has placed upon them, as per royal measure, they shall return to *Nergal-iddina*.

The names of three witnesses, of the scribe and the date follow.

Annotations: L. 1. *nak-kan-da-ru* is an interesting formation from the root *kadaru*, "to confine," and doubtless is a synonym of *muṣru*, "district."

L. 3. *ma-ḥi-ši-e* is perhaps the title of an official; cf. Muss-Arnold, *Dict.*, p. 525a.

Translation: 15 kors of barley due to *Nâdin*, son of *Balâtsu*, to be paid by *Ardu* . . . , son of *Shulâ*, and *Balâtsu*, son of *nâsir*. In Tammuz in Nippur in its full amount they shall pay. The one becomes responsible for the other that he will pay the loan. In addition the debt of 2 minas of silver which *Nadin* gave to them for the *nubti* of *Ellil-shâpik-zêr* the *Guenna*. In addition the former debt which rests upon *Balâtsu*.

The names of three witnesses and the scribe, besides the date, follow.

Annotations: L. 9. The *GU-EN-NA* seems to be the chief official in connection with the administrative affairs of the temple, and perhaps, in view of what follows, the chief executive of the city. *GU* means *kishâdu*, "neck," and *EN-NA*, "lord." This official may have been originally the "executioner." Radau translates "sheriff-in-chief," which appears on a label of a tablet in the University Museum. *GU* also means *emûqu*, in which case cf. *bi-el e-mu-qi*, Haupt, *Akkadische and Sumerische Keilschrifttext*, p. 40. *GU* also has the value *asharidu* and *rêshu*, and more probably means the "foremost lord," or "duke." In the annals of *Ashurbânipal*, the children of the king, the *GU-EN-NA* and other important personages of Gambulu are carried into captivity to Assyria (cf. *K. B.*, II, p. 182). This implies that the *GU-EN-NA* was an important state official. In Behrens, *Assyrische Babylonische Brief Kultischen Inhalts aus der Sargondenzeit*, p. 6, note 2, the one who addresses the king is the *GU-EN-NA*. In text 94 : 10 of this volume, payment is to be made according to the measure of the *GU-EN-NA* to the *GU-EN-NA Nippuri*. In my *B. E.*, Vol. XIV, an important official named *Amêl-Marduk*, who is called *GU-EN-NA Nippuri*, conducted the affairs of the Temple storehouse in the reign of *Burna-Buriash* and *Kuri-Galzu*. In 135 he makes an agreement to assume a debt for which a priest was imprisoned. In this text he is referred to as "his lord." In 16 : 4 he makes payment to another official. In 136 : 1 he audits the accounts of the priestesses. In 137 : 28 his seal endorsement is fixed to a loan of cattle, presumably temple property. It appears also on 123a : 15. In *C. B. M.* 12929, the *GU-EN-NA* acknowledges the receipts of temple income, in a manner similar to *Innannu* and *Martuku*, who prior to the time of *Amêl-Marduk* were the chief officials, cf. my *B. E.*, XIV, p. 9, although neither of these bear the title *GU-EN-NA* in any of the documents published. In fact their names generally are given without titles. It is quite probable that they also occupied this office, namely *GU-EN-NA Nippuri*.

Translation: . . shekels of silver, 1 large sheep and 1(?) kor of barley, in addition, 10 shekels of silver, as a royal tithe (*nidintum*) due from *Hannia*, son of *Ashur-shar-ušur*, *Ibâ*, son of *Zûpa-El*, and *Sulummâdu*, son of *Sinkaeshshu*, to be paid by *Nergal-iddina*, son of *Ahûtu*. In Shebet he shall pay.

(The names of three witnesses, the scribe and the date are followed by:)

The silver he shall pay in 1 shekel pieces.

(The Aramaic endorsement reads:) For *Hannia*, *Ibâ*, *Sulummadu*, against *Nergal-iddina*.

Annotations: L. 1. *ni-din-tum* apparently is a "tariff" or rather "gratuity" which is to be given the State. At least that seems to be the meaning in the *Murashû* texts. The field, doubtless, had been the gift (*nidintum*) of the Crown, which expected an annual tithe. This tax in consequence was called the *nidintum*. C. B. M. 12929 refers to *ni-din-tum mahritum*, whereas B. E., Vol. X, No. 78, refers to *ni-din-tum arkîtum*. The endorsement on both these tablets contains the Aramaic word כנה for *nidintum*. Cf. my article on "Aramaic Indorsements on the Documents of the Murashû Sons," *Harper Memorial Volume*, II, p. 286ff.

DESCRIPTION OF TABLETS

ABBREVIATIONS.

C. B. M., Catalogue of the Babylonian and General Semitic Section of the Archaeological Museum of the University of Pennsylvania (prepared by the Editor); **cor.**, corner; **E.**, edge; **E. A. H.**, Hoffman Collection, General Theological Seminary, New York City; **exp.**, expedition; **frag.**, fragmentary; **h.**, height; **impr.**, impression(s); **inscr.**, inscription; **J. D. P.**, Collection bought by Prof. Hilprecht, January 27, 1889, and presented by Prof. J. D. Prince, of Columbia University; **J. S.**, Joseph Shemtob Collection, purchased in London by Prof. A. L. Long and Dr. R. F. Harper, July 21, 1888; **Kh.**¹, First Khabaza Collection, bought in London, August 15, 1888, by Mr. E. W. Clark; **Kh.**², Second Khabaza Collection, bought at Baghdad for the University by Dr. R. F. Harper, January, 1889; **L.**, Left; **li.**, lines; **Lo.**, Lower; **Ni.**, Nippur; **Ni. IV, V, and X** refer to the corresponding numbers of the plan of the Nippur mounds in Hilprecht, *B.E.*, Vol. I, part 1, Pl. XV. Cf. also Peters, *Nippur*, Vol. I, fac. p. 242, which shows the trenches of the first expedition, and Vol. II, fac. p. 172, for the plan, showing trenches of the second expedition. The exact provenience of the tablets found on the third expedition is not known. **No.**, Number; **O** or **Obv.**, Obverse; **Pl.**, Plate(s); **R**, Right; **Rev.**, Reverse; **U.**, Upper.

The measurements are given in centimeters, length (height) $\times$ width $\times$ thickness. Whenever the tablet (or fragment) varies in size, the largest measurement is given. The tablets which are not recorded as belonging to **E. A. H.**, **J. D. P.**, **J. S.**, **Kh.**¹, or **Kh.**² Collections have been excavated at Nippur, except No. 141, which has been copied in the Metropolitan Museum of Art, New York City.
